# NACE FIRST-DESTINATION SURVEY CLASS OF 2015: SURVEY DEFINITIONS

# FIRST DESTINATIONS FOR THE COLLEGE CLASS OF 2015: DEFINITIONS

## Data Elements

The NACE Standards call for a comprehensive assessment of graduate outcomes; consequently, the number of outcomes categories to be detailed in the outcomes report are somewhat expanded from the usual list. In addition to detailing traditional employment in which a graduate works for an employer with relatively steady work hours, a defined wage/salary, and a presumption of benefits such as medical insurance, the standards call for recognizing other employment situations. These additional employment categories include the following:

**Entrepreneurs:** These are graduates who have started their own businesses (store, manufacturer, and so forth). They have multiple customers/clients and may employ other individuals in their operations.

**Contract/Temporary Workers:** These are graduates who are essentially working for one client but are working on a specific project, which has a limited timeframe after which the graduate is not likely to be employed by that client.

**Freelancers:** These are graduates who develop their own project, complete it, and sell it to a client, activities that are traditionally associated with artists, journalists, authors, etc.

**Post-graduate Fellowships or Internships:** These are graduates who are performing a function, such as research or teaching, supported by a stipend provided by the university or an outside agency, such as the Fulbright programs sponsored by the U.S. State Department, or graduates who are engaged in an experiential learning activity with any type of employer. These activities are for a limited period of time and do not contain the promise of continued employment after the fellowship or internship period expires.

**For advanced degree graduates two additional categories were included:** faculty positions that are either tenure tracked or non-tenure tracked. In a non-tenure tracked position, a graduate will be employed by an institution of higher learning to teach a set number of

courses for a specified period of time—most likely a semester appointment or a year-long contract. Tenure track positions are teaching assignments where the graduate is contracted to be at the institution for a more extended period of time, e.g., three years. At the end of the contracted period or sometime during the period, the graduate is promised to come under consideration for a “permanent” appointment.

All but the faculty appointments are employment categories that could be designated as either full time or part time. Full-time employment is defined by the Standards as being employed for 30 hours per week or more on a regular basis.

In addition to these employment categories, there were three other areas defined as positive outcomes for graduates. These were service, the military, and continuing education.

Service is defined as being employed with an agency that is providing assistance to groups or individuals in the public interest. Examples are employment with AmeriCorps/VISTA, the Peace Corps, and Teach for America. This employment is generally for a limited duration and is assumed to be full-time but paid at limited levels not on par with traditional employment categories. Military is employment with a branch of the United States Armed Forces. It is assumed that this employment is regular, full-time duty and is not simply as part of a reserve unit. Continuing education refers to students who are actively engaged in pursuing another degree completion or certificate that may be required for their profession, e.g., certified public accountant (CPA).

Taken together, the preceding categories represent the total number of students who have achieved an outcome as of six months after the end of the class year.

Finally, there are graduates who the institution knows have not landed in any of these categories but are still pursuing a landing. These students may be identified as still seeking an outcome. They may be principally interested in obtaining employment (still

seeking employment) or the primary goal may be to be admitted to a graduate or professional program (still seeking continuing education). Those graduates who the institution knows have decided not to pursue any landing (employment, service, the military, or continuing education) in this period after graduation are to be designated as “not seeking.”

For each graduate there is to be one and only one primary destination category designation. Many schools have traditionally allowed students to respond to the outcomes survey with multiple outcome designations, e.g., employed but still seeking. The Standards do not allow for such a designation. Many individuals in the work force, not just recent graduates, are employed in positions from which they wish to advance and are, hence, seeking employment. However, in designating their current situation, they are employed and are treated as such without adding that they are open to an alternative opportunity.

### Compensation

The Standards call for collecting starting salary and guaranteed bonus information for graduates who are employed on a full-time basis. Not all reporting institutions were able to provide these compensation data; however, just over 79 percent of the responding institutions did supply some form of compensation information.

Schools that did report data provided average and median starting salary information, and average and median bonus data. Along with the salary and bonus information, a responding institution was also required to provide the number of salaries and bonuses that constituted their compensation information. NACE then calculated overall salary and bonus information for the class and subgroups within the class by weighting the individual institutional averages and medians by the number of salaries or bonuses represented by an individual institutions data.

### Compilations

After the detailed data were transmitted to NACE a number of summary calculations were developed from the data.

**Knowledge Rate:** This is the percentage of the graduating class for whom an outcomes destination is known. It includes the sum of all the employment categories, plus service and military, plus continuing education, plus the number of students still seeking an

outcome or not seeking an outcome. It excludes those students for whom no information is available.

**Mathematically, the knowledge rate can be expressed as:**  

$$\frac{(\# \text{ employed} + \# \text{ service} + \# \text{ military} + \# \text{ continuing education} + \# \text{ still seeking employment \& continuing education} + \# \text{ not seeking})}{\text{total graduates}}$$

**Career Outcomes Rate:** This is the number of graduates who have landed in either any of the employment categories plus service and military plus continuing education divided by the number of students for whom an outcome is known.

**Expressed mathematically the career outcomes rate is:**  

$$\frac{(\# \text{ employed} + \# \text{ service} + \# \text{ military} + \# \text{ continuing education})}{(\# \text{ employed} + \# \text{ service} + \# \text{ military} + \# \text{ continuing education} + \# \text{ still seeking employment \& continuing education} - \# \text{ not seeking})}$$

Additional rates such as the percent of graduates in standard full-time employment were created by taking the number of graduates in a specific category and then dividing by the number of known graduates as identified in the career outcomes rate above.

To present the overall outcomes for the Class of 2015, NACE summed the data from the individual reporting institutions to compile overall numbers for the graduating base, number of known students, number employed in each individual category, number in continuing education, number still seeking employment, and so forth. These overall numbers were then used to calculate percentages for the knowledge rate, career outcomes rate, percent in continuing education, and so on for the Class of 2015 as a whole by degree level. The numbers reported in the findings section represent the aggregated results from the reporting institutions rather than the average of the individual reporting schools.

### First-Destination Groupings

To allow for some degree of benchmarking overall, institution-level results were divided along a number of different dimensions/groups. These groupings included geographic location, school types, institutional control (public vs. private), and the size of the institution as defined by its number of students. The following are the grouping definitions used in this report.

### Region

Data were divided into eight geographic regions

consistent with the geographic distribution of colleges and universities in the IPEDS (Integrated Postsecondary Education Data System) database. The regions are:

**New England:** Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, and Connecticut

**Mid-Atlantic:** New York, New Jersey, Pennsylvania, Delaware, Maryland, and the District of Columbia

**Southeast:** Virginia, West Virginia, North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Tennessee, Kentucky, Arkansas, and Louisiana

**Great Lakes:** Ohio, Indiana, Illinois, Michigan, and Wisconsin

**Plains:** Minnesota, Iowa, Missouri, North Dakota, South Dakota, Nebraska, Kansas

**Southwest:** Oklahoma, Texas, New Mexico, and Arizona

**Rockies:** Colorado, Wyoming, Montana, Idaho, and Utah

**Far West:** Nevada, California, Oregon, Washington, Alaska, and Hawaii

### **Carnegie Classification – Basic**

Schools were grouped by type of degree offered. The groupings are a modified form of the basic classification scheme used by the Carnegie Commission on Higher Education. The three classes used in the report are:

**Doctoral:** Institutions that awarded at least 20 research doctoral degrees during 2010 (excluding doctoral-level degrees that qualify recipients for entry into professional practice, such as the JD, MD, PharmD, DPT, and so forth)

**Master's:** Institutions that awarded at least 50 master's degrees and fewer than 20 doctoral degrees during 2010

**Baccalaureate:** Institutions where baccalaureate degrees represent at least 10 percent of all undergraduate degrees and where fewer than 50 master's degrees or 20 doctoral degrees were awarded during 2010

### **Institutional Control**

Institutional control refers, essentially, to whether the institution's direction through its Trustees is determined by a governmental entity (public control) or is determined by an internal structure (private control).

While private control can be further subdivided between institutions that have a for-profit objective and those that have not-for-profit status, this report does not make that distinction as only one institution with for-profit status provided data.

### **Size**

Four size categories are used. Size is based on the undergraduate full-time enrollment as reported in IPEDS for the 2014 academic year.

**Very small:** Total enrollment of less than 1,950

**Small:** Total enrollment of greater than or equal to 1,950 but less than 3,990

**Medium:** Total enrollment of greater than or equal to 3,990 but less than 9,050

**Large:** Total enrollment greater than or equal to 9,050

These divisions result in four equal groups, each representing 25 percent of the responding schools.

### **Academic Disciplines/Majors**

Beyond categorizing outcomes information for the institution as a whole, the NACE Standards call for reporting the results by academic program.

In submitting their outcomes to NACE, participating schools were asked to provide detail, including the compensation results by academic program. Respondents were free to list these programs by titles used on their campuses. However, in order to make the data as comparable as possible across schools, NACE staff reclassified the program titles to conform with the classification of instructional programs (CIP) used in the IPEDS database.

The CIP system organizes academic programs into a tree structure in which a general discipline forms the trunk and academic majors are identified into two defined branches—the first being a more generic class of programs under the discipline, the second the more specific title. For example, business is classed as a

broad discipline encompassing a group of relatively broad majors, such as business administration and management, and very specific programs under that broad major, such as logistics/supply chain, which is a program under the heading of business administration and management.

Unfortunately, not every participating school in this year's study was able to provide outcomes information by academic program. However, NACE did receive program level information from approximately 150 schools that allowed for the identification of program-level results at the trunk/discipline level for 32 broad disciplines and at broad major level for an additional nearly 200 majors. The outcomes detail for each program is available on the NACE website.
