Recruiting Enablement

The practice of providing talent acquisition professionals with the tools (processes, content, and technology) that they need to be effective and efficient at recruiting quality hires.

Reactive Recruiting

- ❌ Poor alignment between recruiting and business
- ❌ Lack of data and insights
- ❌ Inconsistent processes
- ❌ No or little content to engage candidates

VS

Recruiting Enablement

- ✅ Strong alignment between business and recruiting goals
- ✅ Improvements made based on data
- ✅ Consistent processes
- ✅ Content created and improved based on data

63% say quality of hire is the greatest challenge, yet...

- No standard around measuring it
- Talent decisions based on gut

Protecting the Candidate Experience

And your future talent pipeline!

Driving better outcomes through process

Protecting relationships with *“Unqualified Fandidates”*

Unqualified *“fandidates”* are brand fans that apply for open roles, but whose skills are not yet a fit for that role.

- Identify unqualified applicants
- Design workflows that let them down easy & protect your brand

VS

Building relationships with qualified *“Casual Candidates”*

The best candidates are often casual: they are aware of their value, have more than one offer to consider, and are snapped up fast⁹.

- Identify top candidates
- Fast track them to the next step in your process

Leverage automation (data-driven and/or templated)

Lifting the Administrative Burden
